

## Model HBD Base Drum Heater

In line with the company policy of continued improvement and incorporation of the latest development on electrical construction and safety of our products, we are pleased to issue the following statement with respect to the EEC Directive 93/465/EEC on CE Marking of electrical products.

The insulation system and construction of the Heaters meet the requirements of all the relevant EEC Directives including the Low Voltage Directive (LVD) and the Electromagnetic compatibility Directive (EMC).

To meet these requirements "The Heaters" are produced to meet or exceed the requirements of all the relevant national and international standards.

In line with these directives we have "CE" marked the heaters, this being The Recognised Declaration within the European Economic Area (EEA) of compliance with EEC Directives.

The heater and control assembly must be used in accordance with the Instructions provided.

The heater is supplied with an armoured flexible cord terminated in a Heavy duty VDE approved Rubber Plug rated as IP 44 to CEE-Norm 7/V11 as an integral part of the heater/control unit.

If the Heater Control, Flexible Cord or Plug are damaged, the heater must not be used and should be returned to the supplier or the manufacturer for repair. No attempt to repair the Heater, Control, Flexible Cord or Plug should be made as it will invalidate to the CE declaration and may render the heater unsafe to use.

I the undersigned, hereby declare that the equipment specified above conforms to the Directive(s) and standard(s)
