Continuing to Set Performance Standards

Advantages:

The original and still the best, for proven reliability and value for money, RaceReady tyrewarmers continue to set performance standards. Available in a variety of colours with the option of personalised logos, even the enthusiastic amateur can portray the works team impression. We have standard sizes available from stock or bespoke sizes to order.

Proven Reliability:

The RaceReady brand of heaters are the latest in a long line of tyrewarmers manufactured by Holroyd. Exceeding the latest safety and performance requirements coupled with proven reliability gained over 30 years of experience in manufacturing.

Insulation:

All heaters have a thermal insulation barrier of needled polyester that provides rapid warm up and efficient distribution of the heat generated.

Temperature Control:

A high precision integrated thermostat controls the Tyrewarmer to within a few degrees. You can be assured that due to this close control your tyres are absorbing the optimal amount of heat. Temperature control is further enhanced by layers of thermal insulation. Power to the tyrewarmers can be observed via the red neon indication lamp.

Fitting:

Large Velcro pads and elasticated drawstrings provide an easy, hassle free, fitting. These quick release pads aid rapid removal allowing RaceReady tyrewarmers to remain fitted until the very last moment.

Technical Data:

Inner material:	Cotton inner on heating face.
Insulation:	Needled Polyester on back.
Heating Element:	Silicone Rubber double insulation.
Colours:	Black, Blue or Red.
Voltage:	110 or 230 Volt.

Branding:

Customer's own branding can be applied to both the tyrewarmer and the storage bag. Practically any logo in any colour combination can be achieved.

Storage:

Each set of tyrewarmers are supplied with a handy storage bag which is water resistant and compact.
